SUMMARY

Computer Science graduate with production-grade applications in deployment and hands-on contract experience in frontend development, now seeking a full-time Frontend Developer role. Most recently built the production frontend for Nudgine, an early-stage US-based startup building real-time AI meeting guidance software — owning marketing pages, authentication and onboarding flows, a production-ready password reset and account-security system, server-side route handlers, and a shared component system on Next.js 16 (App Router) and React 19. Past work includes a Next.js + Supabase church membership system serving 3,000+ live records with Gemini API integration, and a full-stack time tracking SaaS with VS Code and Chrome extensions for automated activity capture. Experienced building role-based systems, AI-augmented workflows, authentication/security hardening (TOCTOU-safe token handling, brute-force protection, reCAPTCHA), subscription/billing flows, and multi-currency financial tooling.

SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, SQL

Frontend: React 19, Next.js 16 (App Router, Server Components), Tailwind CSS 4, Shadcn UI, HTML5, CSS3

Backend & Databases: Supabase, PostgreSQL, MySQL, MongoDB (native driver, TTL indexes, atomic operations), Flask, Node.js, REST APIs, WebSockets

Auth & Security: JWT authentication, RBAC, bcrypt, Google OAuth, TOCTOU-safe atomic operations, distributed rate limiting, progressive brute-force backoff, reCAPTCHA v2 (invisible)

Payments: Stripe (Checkout, Billing Portal, Webhooks, capacity billing, subscriptions)

AI & LLM: Gemini API, prompt engineering, LLM report summarization, natural language Q&A over structured data, OpenAI GPT-4.1-nano integration

Tools & Cloud: Vercel, Git, GitHub (Projects, sprint workflows, CI/CD via GitHub Actions), pnpm + Turborepo monorepos, Figma (design-to-code), Zod, Recharts, Tiptap

Other: WCAG accessibility audits, keyboard navigation testing, cross-device/browser QA, CSV data pipelines, browser extensions, VS Code extensions

ML/AI (academic): TensorFlow, Keras, scikit-learn, CNN image classification

EXPERIENCE

Frontend Developer / Software Developer | Nudgine LLC

Jun 2026 - Aug 2026

Alpine, Utah, USA (Remote) · Contract · Real-time AI meeting guidance software

- Redesigned and shipped the Nudgine marketing/landing experience end-to-end (animated hero, aurora background, sticky frosted-glass navbar, use-cases marquee) and extracted a shared component library (BrandMark, SectionPill, FadeIn, SpotlightCard, LandingNavbar) reused across 10+ marketing and auth pages, using Next.js 16, React 19, TypeScript, and Tailwind CSS 4.
- Built the `/pricing` page (usage-based Pro-plan slider, animated plan comparison table, billing FAQ) and 8 additional SEO-optimized marketing pages (Product, How it Works, Use Cases, Security, About, FAQs, Blog, Changelog), each with full SEO metadata and structured data.
- Rebuilt the Login, Signup, and Auth Modal on a shared authentication foundation with Google OAuth, invisible reCAPTCHA v2, and layout-stable animated transitions; implemented the sitewide typography system (next/font: Poppins, Plus Jakarta Sans, Inter).

- Delivered a production-ready password reset and account-security system spanning 5 API routes and 3 UI pages with SHA-256-hashed reset tokens, MongoDB TTL-based expiration, TOCTOU-safe atomic token invalidation, and transactional email; authored 25 passing integration tests covering auth flows and timing-sensitive brute-force delay behavior.
- Engineered a progressive exponential-backoff brute-force protection system (10s → 1min → 5min → 15min escalation), replacing a flat random delay and extending the shared rate-limiting infrastructure with configurable, validated delay schedules.
- Built the post-signup onboarding flow (server-side plan selector checking auth/subscription state and routing users into Stripe Checkout, contact-sales, or the free workspace) and resolved Stripe billing issues, including checkout email prefill and a toast-based billing-success redirect.
- Built the public legal pages (Privacy Policy, Terms of Service, Cookie Policy), a multi-jurisdiction Data Subject Access Request (DSAR) form, and the Contact Us page with category-based routing; ran WCAG accessibility, keyboard-navigation, dark-mode, and cross-device audits (44px touch targets) on every PR, and migrated legal/internal-doc domain references from nudgine.app to nudgine.ai.

Full-Stack Developer & AI Integration | *United Church of Christ in the Philippines*

Jul 2025 - Jul 2026

Iligan City, Philippines · Contract

- Architected and shipped a production membership system in Next.js (App Router), TypeScript, and Supabase, managing 3,000+ live member records across a 40+ field normalized PostgreSQL schema covering personal, family, church, and ministry data.
- Built two Gemini API features: an AI report summarization tool that interprets filtered member exports and returns natural language demographic and trend analysis, and a conversational Q&A interface for non-technical admins to query membership data in plain English.
- Implemented server-side RBAC via Next.js Middleware, verifying Supabase JWT sessions on every request and routing Admin, Staff, and Member users to separate portals with no client-side enforcement gaps.
- Developed a configurable reports module with live search, multi-criteria filtering, toggleable columns, and one-click CSV export, reducing reporting time by approximately 80% versus the previous spreadsheet-based process.
- Deployed to Vercel with CI/CD on every push to main; migrated 3,000+ historical records to the new schema with zero data loss during go-live.

UI/UX Design Intern | *Sikai Inc.*

Jun 2024 - Jul 2024

Iligan City, Philippines · Internship

- Designed the eTanom Planter's Interface, a reforestation platform, with responsive layouts for web and mobile covering 8+ end-to-end flows: OTP onboarding, proof-of-planting uploads, earnings tracking, GCash/Maya/bank withdrawals, and in-app messaging.
- Built a WCAG-compliant color system with documented contrast ratios across 9 shade levels (AA/AAA on light and dark surfaces) and delivered annotated Figma handoffs with full interaction states, cutting developer clarification rounds for a 4-person engineering team.

PROJECTS

Church Membership Management System uccpiligan.vercel.app

2025 - 2026

Next.js · TypeScript · Tailwind CSS · Supabase · PostgreSQL · Gemini API · Zod · Recharts · Vercel

- Live production app serving UCCP Iligan: three-tier RBAC, dual-portal architecture, AI-powered report summarization and natural language Q&A via Gemini, and configurable member reports with CSV export.

Chrona - Time Tracking SaaS for Freelancers chrona-time-tracker.vercel.app

2026

Next.js · TypeScript · Tailwind CSS · Supabase · Shadcn UI · Tiptap · Recharts · VS Code Extension · Chrome Extension · Vercel

- Built a full-stack time tracking platform with automated activity capture via a VS Code extension (git commits, file activity) and a Chrome extension (tab tracking), eliminating manual time logging for developers.

- Implemented a focus score engine, 52-week contribution heatmap, multi-workspace support, rich text session notes (Tiptap), and multi-currency invoice generation with PDF and CSV export.

Clinic Management System github.com/edaprgs/clinic-management-system

2023 - 2024

Python · Flask · MySQL · Flask-SocketIO · Cloudinary · Flask-Login · Flask-Mail

- Multi-role clinic platform (Admin, Doctor, Medical Technician, Receptionist) with server-side role enforcement, real-time cross-role notifications via Flask-SocketIO, Cloudinary file uploads, automated credential emails, and prescription assistance from lab results and patient history.

CNN Hair Type Recognition github.com/edaprgs/cnn-hair-type-recognition

2024

Python · TensorFlow · Keras · scikit-learn

- Trained a CNN on a custom 6,000-image dataset to classify four hair types; applied data augmentation and achieved 79.67% test accuracy over 20 epochs with minimal overfitting.

EDUCATION

Mindanao State University - Iligan Institute of Technology

Iligan City, Philippines

BS Computer Science, Cum Laude · 2021 - 2025

LEADERSHIP

MSU-IIT CS Society, Secretary - 2024 - 2025

Managed records and coordinated events for a 100+ member student organization. Awarded Certificate of Student Leadership.
